SIMPLY PROFESSIONAL DICTATION

## Digta SonicMic 3 Classic

*The advantages are right there in your hand*

### Digta SonicMic 3 Classic

Optimized for stationary dictation and speech recognition

Dictate without disrupting text flow – pushbutton commands require minimal thumb movement. The new microphone technology guarantees excellent speech recognition.

- Perfect dictation control: recording and speech recognition are controlled with the touch of a button through a direct interface with Dragon NaturallySpeaking and other dictation software
- Outstanding speech clarity provided by frequency-optimized microphone capsule positioning and pop filter
- Brilliant recording quality and clear playback with integrated sound card and powerful loudspeaker
- Simple button controls: rocker switch for recording and playback
- Individually programmable control buttons: Clearly organised configuration tool with graphical support for assignment of hotkey and speech recognition commands
- Outstanding ergonomics: user-friendly operation provided by logical button layout. The polished surfaces of the control elements minimize touch noise. The special housing shape allows air circulation, preventing palm sweating.
- Professional, long-lived work device with outstanding price-performance ratio
